LEARN MORE ABOUT THE I-205 WIDENING AND SEISMIC IMPROVEMENTS PROJECT!

Participate in the online open house between November and December 2017.

This project addresses congestion, traveler safety, and seismic resiliency on seven miles of I-205 between Stafford Road and OR 99E. The project includes:

- Adding a third lane on I-205 between Stafford Road and OR 99E.
- Seismically upgrading the Abernethy Bridge, which crosses the Willamette River between West Linn and Oregon City and all other I-205 bridges within the project area limits.
- Replacing West A Street and Sunset Avenue, which cross over I-205 to accommodate the widened freeway.
- Consolidating two separate northbound I-205 on-ramps near OR 43 to eliminate the merging and weaving that currently occurs on I-205, reducing rear end crashes and improving traffic flow.
- Installing ODOT RealTime traveler information signs.

To learn more, visit the project website to participate in the online open house and read the latest newsletter.
