

Beavercreek Road Design

November 12, 2019 City Commission Work
Session

Beavercreek Background

Project Purpose- Implement the Beavercreek Concept Plan by adopting new Zoning and Comprehensive Plan Maps and creating development code to implement vision of the plan

Grant- Department of Land Conservation and Development (DLCD)

Build upon existing public process that adopted the Concept plan in 2008 and readopted in 2016

Public Comments Spring 2019- 11 years later a fresh look may be needed to see if the adopted 3-lane design of Beavercreek Road reflected the community vision

Presented initial findings

DKS Associates-all potential road configurations met the requirements for rezoning, including the Transportation Planning Rule (TPR)

City Commission asked for additional information on Holly Lane Extension projects, roundabout design and lane costs

Staff reached out to the public with Beavercreek Road Design Survey and mailed information to abutting property owners

Staff ready to present additional information-looking for broad direction on design approach.

August 13, 2019 City Commission
Worksession

City Commission Direction

How many lanes should Beaver Creek Road be within the Concept Plan corridor?

- 3 lanes
- 5 lanes
- A transition from 5 lane to 3 lanes at either Meyers or Loder Roads.

What type of intersections should Beaver Creek Road have within the Concept Plan corridor?

- Traffic signals
- Roundabouts
- Both

City Commission Direction

Should the City renegotiate with ODOT to revise the Alternate Mobility Standard by removing Holly Lane connection projects from the Transportation System Plan (TSP)?

- No
- Yes

Should Beaver Creek Road along the Concept Plan corridor be constructed by developers incrementally as development is built or pursued as a capital improvement project all at once?

- The roadway should be constructed incrementally as development occurs.
- The City should create a funding mechanism for building the roadway as a single project.

Survey Results

**October 24, 2019 to
November 11, 2019**

Would you prefer using roundabouts or traffic signals along this section of Beavercreek Road?

■ Traffic signals ■ Roundabouts

Would you prefer seeing a 3-lane section, 5-lane section or a transition from 5-lanes to 3 lanes along this section of Beaver Creek Road?

■ 3 - Lane ■ 5-Lane ■ Transition

Transportation decisions often involve tradeoffs, knowing that price may be a limiting factor, what elements of Beaver Creek Road are important to you?

	Very Import	Somewhat Important	Important	Not Important	Not Important At All
Pedestrian safety	106	20	32	4	3
Bike safety	77	30	37	11	8
Aesthetics/creating a sense of place	36	36	51	30	6
Reducing vehicle congestion	121	31	15	3	1
Ease of long-term maintenance	54	44	56	10	2
Ease of crossing Beaver Creek Road	70	39	37	12	4

Selected Comments

- “Move the traffic and make it happen. Roundabouts work great, people just need a little time to figure them out.”
- “Traffic signals will allow for safer pedestrian and bicycle traffic. Will also allow for safer methods to cross Beavercreek Rd. especially in the school zone at the high school.”
- “OC is not going to stop future growth along BC Rd. There are no other access roads to get to 213 from Beavercreek due to topography and existing housing. This road will only get busier. Build it out for the future, not just for today.”
- “It sounds as if the traffic studies completed do not recommend a 5-lane cross section. This seems overkill, especially given the future transportation projects mentioned above. I do feel that the posted 20 mph speed limit during 7-5 p.m. on school days is one of the major causes of congestion.”
- “Mostly DON'T want a transition from 5 to 3 lane since it creates such a bottleneck and as a resident of the area already have to deal with that on 213 which is most unpleasant.”

Considerations

Tradeoffs – Number of Lanes

Addressing Future Growth

**Future Major Transportation
Projects**

Conceptual Cost Estimates

Beavercreek Road Options

Adopted 3-Lane
90 feet wide ROW

Optimal 3-Lane Roadway
76 feet wide ROW

Optimal 5-Lane Roadway
100 feet wide ROW

Signals	\$26M	\$22M	\$34M
Roundabouts	\$32M	\$29M	\$48M

Holly Lane Extension- Alternate Mobility

- Removing Holly Lane extension projects from the TSP would require the City to revise the alternate mobility target and provide an alternate project that meets or exceeds the benefit of the Holly Lane extension.
- Staff is currently unable to identify an alternate project which is affordable and has not allocated funding or staff time towards the creation of such an alternative.
- The city must continue work with Clackamas County on the implementation of the Holly Lane connection and believes that the project is an important alternate route to the system to ease congestion in this area.

D37- roundabout at Maple Lane and Holly Lane
D83- Holly Lane -improve cross-section from Redland Road to Maple Lane
(joint County TSP project)
D57 & D58 new collector road

Funding Large Scale Improvements

Developer Funded

Local Improvement District (LID)

Urban Renewal

Grants

Area-specific Transportation System Development Fee (SDC).

Jurisdictional Transfer

Staff Recommendation

**How many lanes should
Beavercreek Road be within the
Concept Plan corridor?**

**A transitional section extending the
existing 5 lane section near Maple Lane
and transitioning to a 3- lane section at
Loder Road.**

Staff Recommendation

**What type of intersections should
Beavercreek Road have within the
Concept Plan corridor?**

Traffic signal

Staff Recommendation

Should the City renegotiate with ODOT to revise the Alternate Mobility Standard by removing Holly Lane connections from Transportation System Plan (TSP)?

No

Staff Recommendation

Should Beaver Creek Road along the Concept Plan corridor be constructed by developers incrementally as development is built or pursued as a capital improvement project all at once?

The roadway should be constructed incrementally as development occurs.

Questions and Next Steps
