

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

Table A: Likely to be Funded Transportation Projects

Project #	Description		Extent	Elements	Priority / Funding
Funded Driving Solutions (Intersection and Street Management- see Figure 14, Volume 1)					
D1	Molalla Avenue/ Beavercreek Road Adaptive Signal Timing	Molalla Avenue from Washington Street to Gaffney Lane; Beavercreek Road from Molalla Avenue to Maple Lane Road	Deploy adaptive signal timing that adjusts signal timings to match real-time traffic conditions.		Short-term Likely to be Funded
D7	Option 1: 14 th Street Restriping	Option 1: OR 99E to John Adams Street	Option 1: Convert 14 th Street to one-way eastbound between McLoughlin Boulevard and John Adams Street: • Convert the Main Street/14th Street intersection to all-way stop control (per project D13). • From McLoughlin Boulevard to Main Street, 14th Street would be restriped to include two 12-foot eastbound travel lanes, a six-foot eastbound bike lane, a six-foot westbound contra-flow bike lane, and an eight-foot landscaping buffer on the north side • From Main Street to Washington Street, 14th Street would be restriped to include two 11-foot eastbound travel lanes, a five-foot eastbound bike lane, a five-foot westbound contra-flow bike lane, and an eight-foot on-street parking lane on the north side • From Washington Street to John Adams Street, 14th Street would be restriped to include one 12-foot eastbound travel lane, a six-foot eastbound bike lane, a six-foot westbound contra-flow bike lane, and an eight-foot on-street parking lane on the north and south side • Add a bicycle signal, with detection at the McLoughlin Boulevard/14th Street intersection. Add bicycle detection to the traffic signal at the Washington Street/14 th Street intersection.		Short-term / Likely to be Funded
	Option 2: Main Street/14 th	Option 2: Main	Option 2: Convert the Main Street/14 th Street intersection to all-way		

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

	Street Intersection Widening	Street/14 th Street	stop control (per project D13). Widen 14 th Street to include shared through/left-turn and through/right-turn lanes in both directions	
D8	15 th Street Restriping	OR 99E to John Adams Street	Convert 15th Street to one-way westbound between Washington Street and McLoughlin Boulevard: • From John Adams Street to Washington Street, 15th Street would be striped as a shared-roadway (per project B6). • From Washington Street to Main Street, 15th Street would be restriped to include two 11-foot westbound travel lanes, a five-foot westbound bike lane, a five-foot eastbound contra-flow bike lane, and an eight-foot on-street parking lane on the south side. Complete the sidewalk gaps on the north side of 15th Street between Main Street and Center Street, and on the south side between Center Street and Washington Street (per project W75). • From Main Street to McLoughlin Boulevard, 15th Street would be restriped to include two 12-foot travel lanes, a six-foot westbound bike lane, and an eight-foot on-street parking lane on the south side. Add a 12-foot shared-use path with a two-foot buffer adjacent to the on-street parking lane. Add bicycle detection to the traffic signal at the Washington Street/15th Street intersection.	Included with project D7 / Likely to be Funded
D11	Optimize existing traffic signals	Citywide	Optimize the existing traffic signals by updating the existing coordinated signal timing plans, upgrading traffic signal controllers or communication infrastructure or cabinets.	Short-term/ Likely to be Funded
D12	Protected/permitted signal phasing	Citywide	Incorporate protected/permitted phasing for left turn movements at traffic signals.	Short-term/ Likely to be Funded
D13	Main Street/14 th Street Safety Enhancement	Main Street/14 th Street	Convert to all-way stop control to be consistent with the traffic control at surrounding intersections on Main Street.	Included with project D7/ Likely to be Funded
D14	Southbound OR 213 Advanced Warning System	Southbound OR 213, north of the Beavercreek Road intersection	Install a queue warning system for southbound drivers on OR 213 to automatically detect queues and warn motorists in advance via a Variable Message Sign	Short-term/ Likely to be Funded
D27	OR 213/Beavercreek Road	OR 213/Beavercreek	Lengthen the dual left-turn lanes along Beavercreek Road to provide an	Short-term/ Likely to be

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

	Operational Enhancement	Road	additional 200 feet of storage for the eastbound approach	Funded
D28	Washington Street/12th Street Safety Enhancement	Washington Street/12th Street	Install a traffic signal with dedicated left turn lanes for the 12 th Street approaches to Washington Street.	Medium-term/ Likely to be Funded
D30	Molalla Avenue/Division Street-Taylor Street Safety Enhancement	Molalla Avenue/Division Street-Taylor Street	Install a single-lane roundabout	Medium-term/ Likely to be Funded
D32	South End Road/Warner Parrott Road Operational Enhancement	South End Road/Warner Parrott Road	Install a traffic signal with dedicated left turn lanes for the South End Road approaches to Warner Parrott Road	Medium-term/ Likely to be Funded
D33	South End Road/Lafayette Avenue-Partlow Road Operational Enhancement	South End Road/Lafayette Avenue-Partlow Road	Install a single-lane roundabout	Medium-term/ Likely to be Funded
D40	Main Street/Dunes Drive Extension Operational Enhancement	Main Street/Dunes Drive Extension	Install a single-lane roundabout	Long-term/ Likely to be Funded
D41	South End Road/Buetel Road Extension Operational Enhancement	South End Road/Buetel Road Extension	Install a single-lane roundabout	Medium-term/ Likely to be Funded
D42	South End Road/Deer Lane Extension Operational Enhancement	South End Road/Deer Lane Extension	Install a single-lane roundabout	Long-term/ Likely to be Funded
D43	Holcomb Boulevard/Holly Lane North Extension Operational Enhancement	Holcomb Boulevard/Holly Lane North Extension	Install a single-lane roundabout	Long-term/ Likely to be Funded
D44	Beavercreek Road/Loder Road Extension Operational Enhancement	Beavercreek Road/Loder Road Extension	Install a roundabout	Medium-term/ Likely to be Funded
D45	Meyers Road Extension/Loder Road Extension	Meyers Road Extension/Loder Road Extension	Install a single-lane roundabout	Medium-term/ Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

	Operational Enhancement			
Likely to be Funded Driving Solutions (Street Extensions- see Figure 15)				
D46	Meyers Road West extension	OR 213 to High School Avenue	Extend Meyers Road from OR 213 to High School Avenue as an Industrial Minor Arterial. Create a local street connection to Douglas Loop.	Short-term/ Likely to be Funded
D47	Meyers Road East extension	Beavercreek Road to the Meadow Lane Extension	Extend Meyers Road from Beavercreek Road to the Meadow Lane Extension as an Industrial Minor Arterial. Between the Holly Lane and Meadow Lane extensions, add a sidewalk and bike lane to the south side of the street, with a shared-use path to be added on north side per project S19. Modify the existing traffic signal at Beavercreek Road	Medium-term/ Likely to be Funded
D48	Holly Lane North extension	Redland Road to Holcomb Boulevard	Extend Holly Lane from Redland Road to Holcomb Boulevard as a Residential Minor Arterial. Create local street connections to Cattle Drive and Journey Drive.	Long-term/ Likely to be Funded
D49	Swan Avenue extension	Livesay Road to Redland Road	Extend Swan Avenue from Livesay Road to Redland Road as an Residential Collector	Long-term/ Likely to be Funded
D50		Redland Road to Morton Road	Extend Swan Avenue from Redland Road to Morton Road as an Residential Collector	Long-term/ Likely to be Funded
D51	Deer Lane extension	Rose Road to Buetel Road	Extend Deer Lane from Rose Road to Buetel Road as a Residential Collector. Add a sidewalk and bike lane to the east side of the street, with a shared-use path to be added on west side per project S32.	Long-term/ Likely to be Funded
D52		Buetel Road to Parrish Road	Extend Deer Lane from Buetel Road to Parrish Lane as a Residential Collector. Add a sidewalk and bike lane to the east/north side of the street, with a shared-use path to be added on west/south side per project S33. Create a local street connection to Finnegans Way Install a roundabout at South End Road (per project D42).	Long-term/ Likely to be Funded
D53	Madrona Drive extension	Madrona Drive to Deer Lane	Extend Madrona Drive to Deer Lane as a Constrained Residential Collector	Long-term/ Likely to be Funded
D54	Clairmont Drive extension	Beavercreek Road to Holly Lane South	Extend Clairmont Drive from Beavercreek Road to the Holly Lane South extension as an Industrial Collector. Add a sidewalk and bike lane	Long-term/ Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

		Extension	to the south side of the street, with a shared-use path to be added on north side per project S17.	
D55	Glen Oak Road extension	Beavercreek Road to the Meadow Lane Extension	Extend Glen Oak Road from Beavercreek Road to the Meadow Lane Extension as a Residential Collector. Install a roundabout at Beavercreek Road (per project D39)	Long-term/ Likely to be Funded
D56	Timbersky Way extension	Beavercreek Road to the Meadow Lane Extension	Extend Timbersky Way from Beavercreek Road to the Meadow Lane Extension as a Residential Collector. Add a sidewalk and bike lane to the south side of the street, with a shared-use path to be added on north side per project S20.	Long-term/ Likely to be Funded
D57	Holly Lane South extension	Maple Lane Road to Thayer Road	Extend Holly Lane from Maple Lane Road to Thayer Road as a Residential Collector. Add a sidewalk and bike lane to the west side of the street, with a shared-use path to be added on east side per project S14. Install a roundabout at Maple Lane Road (per project D37).	Medium-term/ Likely to be Funded
D58		Thayer Road to Meyers Road	Extend Holly Lane from Thayer Road to the Meyers Road extension as an Industrial Collector. Add a sidewalk and bike lane to the west side of the street, with a shared-use path to be added on east side per project S15.	Medium-term/ Likely to be Funded
D59		Meyers Road to the Meadow Lane Extension	Extend Holly Lane from the Meyers Road extension to the Meadow Lane Extension as a Mixed-Use Collector. Add a sidewalk and bike lane to the west side of the street, with a shared-use path to be added on east side per project S16.	Long-term/ Likely to be Funded
D60	Meadow Lane extension	Meadow Lane to Meyers Road	Extend Meadow Lane to the Meyers Road Extension as a Mixed-Use Collector. Between Old Acres Lane and the Glen Oak Road extension, add a sidewalk and bike lane to the west side of the street, with a shared-use path to be added on east side per project S21.	Long-term/ Likely to be Funded
D61		Meyers Road to UGB (north of Loder Road)	Extend Meadow Lane from the Meyers Road Extension to the UGB (north of Loder Road) as an Industrial Collector	Medium-term/ Likely to be Funded
D62	Dunes Drive Extension	OR 99E to Agnes Avenue	Extend Dunes Drive from OR 99E to Agnes Avenue as a Mixed-Use Collector. Install a roundabout at the Dunes Drive/Agnes Avenue	Medium-term/ Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

			intersection (per project D40). Will require redevelopment of the Oregon City Shopping Center.	
D63	Washington Street to Abernethy Road Connection	Washington Street to Abernethy Road	Connect Washington Street to Abernethy Road with a Mixed-Use Collector. Add a sidewalk and bike lane to the west side of the street, with a shared-use path to be added on east side per project S5. This street should be a public access road built to City standards but maintained by a private entity.	Long-term/ Likely to be Funded
D64	Loder Road Extension	Beavercreek Road to Glen Oak Road	Extend Loder Road from Beavercreek Road to Glen Oak Road as an Industrial Collector. Add a sidewalk and bike lane to the west side of the street, with a shared-use path to be added on east side per project S18. Create a local street connection to Douglas Loop. Install a roundabout at Meyers Road (per project D45).	Short-term/ Likely to be Funded
D65	Parrish Road Extension	From Parrish Road east to Kolar Drive	Complete the gap between Parrish Road as a Constrained Residential Collector.	Long-term/ Likely to be Funded
D66	Washington Street Realignment	Home Depot Driveway to Clackamas River Drive	Washington Street Realignment associated with the OR 213/Washington Street Jug-handle Project.	Under Construction/ Likely to be Funded
D72	Hampton Drive Extension	Hampton Drive to Atlanta Drive	Extend Hampton Drive to Atlanta Drive as a Residential Local Street.	Long-term/ Likely to be Funded
Likely to be Funded Driving Solutions (Street and Intersection Expansions- see Figure 16, Volume 1)				
D80	Division Street Upgrade	7 th Street to 18 th Street	Improve to Collector cross-section, as a constrained street	Long-term/ Likely to be Funded
D81	Beavercreek Road Upgrade	Clairmont Drive (CCC Entrance) to Meyers Road	Improve to Industrial Major Arterial cross-section	Medium-term/ Likely to be Funded
D82		Meyers Road to UGB	Improve to Residential Major Arterial cross-section	Long-term/ Likely to be Funded
D89	South End Road Upgrade	Partlow Road-Lafayette Road to UGB	Improve to Residential Minor Arterial cross-section	Medium-term/ Likely to be Funded
D92	Washington Street Upgrade	11 th Street to 7 th Street	Improve to Minor Arterial cross-section, as a constrained street. Add	Medium-term/ Likely to

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

			curb-ramps at intersections	be Funded
Likely to be Funded Walking Solutions (see Figure 17, Volume 1)				
W5	Washington Street Sidewalk Infill	Washington Street- Abernethy Road Extension to Abernethy Road	Complete sidewalk gaps on both sides of the street	Short-term/ Likely to be Funded
W11	Holcomb Boulevard (East of OR 213) Sidewalk Infill	OR 213 overcrossing to Swan Avenue	Complete sidewalk gaps on both sides of the street	Medium-term/ Likely to be Funded
W12		Longview Way to Winston Drive	Complete sidewalk gaps on both sides of the street	Medium-term/ Likely to be Funded
W13		Barlow Drive to UGB	Complete sidewalk gaps on both sides of the street	Medium-term/ Likely to be Funded
W34	Molalla Avenue Sidewalk Infill	Gaffney Lane to Sebastian Way	Complete sidewalk gaps on both sides of the street	Included with project W74 / Likely to be Funded
W35	Leland Road Sidewalk Infill	Warner Milne Road to Meyers Road	Complete sidewalk gaps on both sides of the street	Short-term/ Likely to be Funded
W41	Warner Milne Road Sidewalk Infill	Leland Road to west of Molalla Avenue	Complete sidewalk gaps on both sides of the street	Short-term/ Likely to be Funded
W42	Beavercreek Road Sidewalk Infill	Warner Milne Road to east of Kaen Road	Complete sidewalk gaps on the east side of the street	Short-term/ Likely to be Funded
W47	South End Road (south of Partlow) Sidewalk Infill	Partlow Road to Buetel Road	Complete sidewalk gaps on both sides of the street	Included with project D89 / Likely to be Funded
W48		Buetel Road to UGB	Complete sidewalk gaps on both sides of the street	Included with project D89 / Likely to be Funded
W54	South End Road (north of Partlow) Sidewalk Infill	Partlow Road to Barker Avenue	Complete sidewalk gaps on both sides of the street	Short-term/ Likely to be Funded
W56	Warner Parrott Road Sidewalk Infill	King Road to Marshall Street	Complete sidewalk gaps on the north side of the street	Short-term/ Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

W62	Linn Avenue Sidewalk Infill	Ella Street to Charman Avenue	Complete sidewalk gaps on both sides of the street	Short-term/ Likely to be Funded
W64	Brighton Avenue-Creed Street Sidewalk Infill	Charman Avenue to Waterboard Park Road	Complete sidewalk gaps on both sides of the street	Short-term/ Likely to be Funded
W65	Brighton Avenue-Park Drive Sidewalk Infill	Charman Avenue to Linn Avenue	Complete sidewalk gaps on both sides of the street	Short-term/ Likely to be Funded
W70	Division Street Sidewalk Infill	7 th Street to 18 th Street	Complete sidewalk gaps on both sides of the street	Included with project D80/ Likely to be Funded
W73	Molalla Avenue Streetscape Improvements Phase 3	Holmes Lane to Warner Milne Road	Streetscape improvements including widening sidewalks, sidewalk infill, ADA accessibility, bike lanes, reconfigure travel lanes, add bus stop amenities.	Medium-term/ Likely to be Funded
W74	Molalla Avenue Streetscape Improvements Phase 4	Beavercreek Road to OR 213	Streetscape improvements including widening sidewalks, sidewalk infill, ADA accessibility, bike lanes, reconfigure travel lanes, add bus stop amenities.	Medium-term/ Likely to be Funded
W75	15 th Street Sidewalk Infill	OR 99E to Washington Street	Complete sidewalk gaps on both sides of the street, with a shared-use path to be added on south side between OR 99E and Main Street per project S53.	Included with project D8 / Likely to be Funded
Likely to be Funded Biking Solutions (see Figure 18, Volume 1)				
B1	7 th Street Shared Roadway	OR 43 Bridge to Railroad Avenue	Add wayfinding and shared lane markings	Short-term / Likely to be Funded
B2	Railroad Avenue-9 th Street Shared Roadway	OR 99E to Main Street	Add wayfinding and shared lane markings	Short-term / Likely to be Funded
B3	Main Street Shared Roadway	OR 99E to 15 th Street	Add wayfinding and shared lane markings	Short-term / Likely to be Funded
B5	12 th Street (west of Washington Street) Shared Roadway	OR 99E to Washington Street	Add wayfinding and shared lane markings	Short-term / Likely to be Funded
B6	15 th Street (west of John Adams) Shared Roadway	Washington Street to John Adams Street	Add wayfinding and shared lane markings	Included with project D8 / Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

B12	Holcomb Boulevard (East of OR 213) Bike Lanes	Longview Way to UGB	Add bike lanes to both sides of the street	Medium-term / Likely to be Funded
B29	Beavercreek Road Bike Lanes	Pebble Beach Drive to UGB	Add bike lanes to both sides of the street	Included with project D82 / Likely to be Funded
B32	Fir Street Bike Lanes	Molalla Avenue to 1,500 feet east	Add bike lanes to both sides of the street	Medium-term / Likely to be Funded
B33	Leland Road Bike Lanes	Marysville Lane to Meyers Road	Add bike lanes to both sides of the street	Medium-term / Likely to be Funded
B35	Meyers Road Bike Lanes	Leland Road to Autumn Lane	Add bike lanes to both sides of the street	Medium-term / Likely to be Funded
B37	Molalla Avenue Bike Lanes	Gales Lane to Adrian Way	Complete bike lane gaps on both sides of the street	Included with project W73 / Likely to be Funded
B42	South End Road (south of Partlow) Bike Lanes	Buetel Road to UGB	Add bike lanes to both sides of the street	Included with project D89 / Likely to be Funded
B53	Holmes Lane Bike Lanes	Linn Avenue to Rilance Lane	Add bike lanes to both sides of the street	Medium-term / Likely to be Funded
B55	Pearl Street Bike Lanes	Linn Avenue to Molalla Avenue	Add bike lanes to both sides of the street	Medium-term / Likely to be Funded
B60	Division Street Bike Lanes	7 th Street to 18 th Street	Add bike lanes to both sides of the street	Included with project D80 / Likely to be Funded
B65	14 th Street Bike Lanes	OR 99E to John Adams Street	Add an eastbound bike lane and a westbound contra-flow bike lane	Included with project D7 / Likely to be Funded
B66	15 th Street Bike Lanes	OR 99E to Washington Street	Add a westbound bike lane and an eastbound contra-flow bike lane, with a shared-use path to be added on south side of 15 th Street between OR 99E and Main Street per project S53.	Included with project D8 / Likely to be Funded
Likely to be Funded Shared-Use Path Solutions (see Figure 19, Volume 1)				
S14	Maple Lane-Thayer Shared-Use Path	Maple Lane Road to Thayer Road	Add a shared-use path on the east side of the Holly Lane extension between Maple Lane and Thayer.	Long-term / Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

S15	Thayer-Loder Shared-Use Path	Thayer Road to Loder Road	Add a shared-use path on the east side of the Holly Lane extension between Thayer and Loder.	Long-term / Likely to be Funded
S18	Loder Road Shared-Use Path	Glen Oak Road to Holly Lane Extension	Add a shared-use path on the south/east side of the Loder Road extension between Glen Oak Road and the Holly Lane extension.	Long-term / Likely to be Funded
S24	Gaffney Lane Elementary Shared-Use Path	Eastborne Drive to Falcon Drive	Add a shared-use path along the northern boundary of Gaffney Lane Elementary School between the Eastborne Drive path and Falcon Drive	Long-term / Likely to be Funded
S36	Tumwater-4 th Shared-Use Path	Tumwater Drive to 4 th Avenue	Add a shared-use path through Old Canemah Park connecting 4 th Avenue to the Tumwater/South 2 nd intersection	Long-term / Likely to be Funded
S53	15 th Street Shared-Use Path	OR 99E to Main Street	Add a shared-use path on the south side of 15 th Street between OR 99E and Main Street.	Included with project D8 / Likely to be Funded
Likely to be Funded Transit Solutions				
T1	Molalla Avenue Transit Signal Priority	Washington Street to Gaffney Lane	Provide priority at traffic signals for buses behind schedule. This includes the use and deployment of Opticom detectors at traffic signals and emitters on buses.	Short-term / Likely to be Funded
T2	OR 99E Transit Signal Priority	Dunes Drive to 10 th Street		Short-term / Likely to be Funded
T3	Bus Stop Amenity Enhancement	Citywide	Add amenities at bus stops as needed, including bus shelters, landing pads, benches, trash/recycling receptacles and lighting	Short-term / Likely to be Funded
Likely to be Funded Street Crossing Solutions (see Figure 19, Volume 1)				
C11	Beavercreek Road/Loder Road Shared-Use Path Crossing	Beavercreek Road/Loder Road intersection	Install crosswalk and pedestrian activated flasher on Beavercreek Road	Long-term / Likely to be Funded
C35	John Adams/7 th Family Friendly Route Crossing	7 th Street/John Adams Street intersection	Install crosswalk and pedestrian activated flasher on 7 th Street	Long-term / Likely to be Funded
Likely to be Funded Family-Friendly Routes (see Figure 17 or 18, Volume 1)				
FF13	Leland-Warner Parrot Family Friendly Route	Leland Road to Warner Parrot Road	Add sidewalks on both sides of the street. Add wayfinding, traffic calming and shared lane markings. Route via Hampton Drive, Atlanta Drive, Auburn Drive and Boynton Street. Includes	Long-term / Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

			Hampton Drive extension to Central Point Road	
FF19	Warner Parrot-Barker Family Friendly Route	Warner Parrot Road to Barker Avenue	Add sidewalks on both sides of the street. Add wayfinding and shared lane markings. Route via Woodlawn Avenue and Woodfield Court.	Long-term / Likely to be Funded
FF20	Barker Avenue Family Friendly Route	South End Road to Telford Road	Add sidewalks on both sides of the street. Add wayfinding, traffic calming and shared lane markings. Route via Barker Avenue	Long-term / Likely to be Funded
FF23	Charman Avenue Family Friendly Route	Telford Road to Linn Avenue	Add sidewalks and bike lanes on both sides of the street. Add wayfinding and traffic calming	Long-term / Likely to be Funded
Likely to be Funded Citywide and Programmatic Improvements / Likely to be Funded				
N/A	Family Friendly Routes	Citywide	Program to systematically implement the Neighborhood Greenway network on a yearly basis	N/A
N/A	Sidewalk Infill Program	Citywide	Capital program to systematically design and construct missing sidewalks along prioritized pedestrian routes. Provide sidewalks on local, residential streets that lead to roadways with transit service.	N/A
N/A	Develop Bicycle and Pedestrian Design Guidelines	Citywide	Develop bicycle and pedestrian design guidelines that establish preferred designs that represent best practices. Key treatments include pedestrian crossing design and bicycle accommodation at intersections (i.e. bike boxes, bicycle detection, etc.).	N/A
N/A	ADA/Curb Ramp Upgrade Program	Citywide	Upgrade curb ramps and eliminate gaps in ADA access along prioritized pedestrian routes near key destinations.	N/A
N/A	Pedestrian Wayfinding Signage	Citywide	Pedestrian wayfinding tools can include signs and walking maps indicating walking routes to destinations and transit stops, as well as digital applications for smart phones.	N/A
N/A	Bicycle Parking Program	Citywide	Implement bicycle rack design and placement standards; review development applications for compliance; coordinate with sidewalk installation by developments or in city projects.	N/A
N/A	Bike Lane Re-striping Schedule	Citywide	Develop a bike lane re-striping schedule.	N/A

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

N/A	Bicycle Wayfinding Signage	Citywide	Implement a bicycle wayfinding signage program to assist bicyclists in choosing comfortable routes and to help visiting bicyclists navigate through the city.	N/A
N/A	Stop Here For Pedestrians signage	Citywide	Add Stop Here For Pedestrians signage at existing and new crosswalks. State standards require installation of a stop line in advance of the crosswalk to use this sign.	N/A
N/A	Bicycle/Pedestrian Connections to Transit	Citywide	Coordinate infrastructure upgrades near transit stops and park and rides to improve access and amenities targeted at increasing ridership.	N/A
N/A	Repaving policy	Citywide	Ensure repaving projects extend the full width of the road, including the full shoulder or bike lane.	N/A
N/A	Streetscape Enhancements	Citywide	Develop projects to create a pedestrian buffer zone on key pedestrian routes, including those that provide access to transit. Streets that would benefit from a buffer zone include Molalla Ave and Warner Milne Rd.	N/A
N/A	Safe Routes to Schools Curriculum	Citywide	Leverage ODOT Safe Routes Program with local investment to bring Safe Routes curriculum to all area K-8 schools.	N/A

Table B: Not Likely to be Funded Transportation Projects

Not Likely to be Funded Driving Solutions (Intersection and Street Management- see Figure 1, Volume 2)				
D2	Beavercreek Road Traffic Surveillance	Molalla Avenue to Maple Lane Road	Install video monitoring cameras and vehicle detection equipment to provide turn movement counts, hourly volumes, travel times, and speed	Long-term Phase 2 / Not Likely to be Funded
D3	Washington Street Traffic Surveillance	7 th Street to OR 213		Long-term Phase 3 / Not Likely to be Funded
D4	7th Street/Molalla Avenue Traffic Surveillance	Washington Street to OR 213		Long-term Phase 3 / Not Likely to be Funded
D5	OR 213/ 7 th Street-Molalla Avenue/ Washington Street	I-205 to Henrici Road	Integrate traffic surveillance and traffic control equipment with ODOT	Long-term Phase 3 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

	Integrated Corridor Management			
D6	OR 99E Integrated Corridor Management	OR 224 (in Milwaukie) to 10 th Street		Long-term Phase 3 / Not Likely to be Funded
D9	OR 213/Beavercreek Road Weather Information Station	OR 213/Beavercreek Road	Install road weather information stations that provide temperature, road conditions, and a video image.	Long-term Phase 4 / Not Likely to be Funded
D10	Warner Milne Road/Linn Avenue Road Weather Information Station	Warner Milne Road/Linn Avenue		Long-term Phase 4 / Not Likely to be Funded
D15	Holcomb Boulevard Curve Warning System	Holcomb Boulevard just to the west of the OR 213 overcrossing		Long-term Phase 3 / Not Likely to be Funded
D16	Holcomb Boulevard Speed Warning System	Holcomb Boulevard east of Jada Way	Install a speed warning system that activates when a motorist approaches at a high speed.	Long-term Phase 4 / Not Likely to be Funded
D17	Washington Street Speed Warning System	Washington Street near 9 th Street		Long-term Phase 4 / Not Likely to be Funded
D18	7 th Street Speed Warning System	7 th Street near Harrison Street		Long-term Phase 4 / Not Likely to be Funded
D19	Linn Avenue Speed Warning System	Linn Avenue near Glenwood Court		Long-term Phase 4 / Not Likely to be Funded
D20	OR 99E Northbound Speed Warning System	OR 99E near Paquet Street		Long-term Phase 4 / Not Likely to be Funded
D21	OR 99E Southbound Speed Warning System	OR 99E near Hedges Street		Long-term Phase 4 / Not Likely to be Funded
D22	Central Point Road Speed Warning System	Central Point Road near White Lane		Long-term Phase 4 / Not Likely to be Funded
D23	South End Road School Zone Flashers	South End Road near Salmonberry Drive and Filbert Drive	Install school zone flashers	Long-term Phase 4 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

D24	Gaffney Lane School Zone Flashers	Gaffney Lane near Glenview Court and Falcon Drive		Long-term Phase 4 / Not Likely to be Funded
D25	Meyers Road School Zone Flashers	Meyers Road near High School Lane		Long-term Phase 4 / Not Likely to be Funded
D26	Beavercreek Road School Zone Flashers	Beavercreek Road south of Loder Road and north of Glen Oak Road		Long-term Phase 4 / Not Likely to be Funded
D29	John Adams Street/7th Street Safety Enhancement	John Adams Street/7th Street	Restripe 7th Street to include a northbound left-turn pocket from 7th Street to John Adams Street.	Long-term Phase 2 / Not Likely to be Funded
D31	High Street/2nd Street Operational Enhancement	High Street/2nd Street	Install a traffic signal	Long-term Phase 4 / Not Likely to be Funded
D34	Central Point Road/Warner Parrott Road Operational Enhancement	Central Point Road/Warner Parrott Road	Restrict left turns from Central Point Road to Warner Parrott Road. Install a roundabout at the Linn Avenue-Leland Road/Warner Parrott Road-Warner Milne Road intersection	Long-term Phase 4 / Not Likely to be Funded
D35	Redland Road/Anchor Way Operational Enhancement	Redland Road/Anchor Way	Install a traffic signal	Long-term Phase 4 / Not Likely to be Funded
D36	Redland Road/Holly Lane Operational Enhancement	Redland Road/Holly Lane	Install a single-lane roundabout	Long-term Phase 4 / Not Likely to be Funded
D37	Maple Lane Road/Holly Lane Operational Enhancement	Maple Lane Road/Holly Lane	Install a single-lane roundabout	Long-term Phase 4 / Not Likely to be Funded
D38	Maple Lane Road/Walnut Grove Way Operational Enhancement	Maple Lane Road/Walnut Grove Way	Install a single-lane roundabout or realign Maple Lane Road in correlation with development	Long-term Phase 3 / Not Likely to be Funded
D39	Beavercreek Road/Glen Oak Road Operational Enhancement	Beavercreek Road/Glen Oak Road	Install a roundabout	Long-term Phase 2 / Not Likely to be Funded
Not Likely to be Funded Driving Solutions (Street Extensions- see Figure 2, Volume 2)				

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

D67	OR 99E to Beutel Road Extension Feasibility Study	OR 99E to Beutel Road	Further study a potential connection between OR 99E and Beutel Road as a Constrained Minor Arterial. Add shared-use path on the east side of the street per project S34. Install a roundabout at South End Road (per project D41). The connection will likely be hindered by topography.	Long-term Phase 4 / Not Likely to be Funded
D68	Chanticleer Place Extension	Glen Oak Road to north of Russ Wilcox Way	Extend Chanticleer Place from Glen Oak Road to Russ Wilcox Way as a Residential Collector.	Long-term Phase 3 / Not Likely to be Funded
D69		South of Talawa Drive to Chanticleer Drive	Extend Chanticleer Place from Talawa Drive to Chanticleer Drive as a Residential Collector.	Long-term Phase 3 / Not Likely to be Funded
D70	Chanticleer Drive Extension	South of Edgemont Drive to Henrici Road	Extend Chanticleer Drive from Edgemont Drive to Henrici Road as a Residential Collector.	Long-term Phase 3 / Not Likely to be Funded
D71	Coquille Drive Extension	Quinalt Drive to Henrici Drive	Extend Coquille Drive from Quinalt Drive to Henrici Drive as a Residential Collector.	Long-term Phase 3 / Not Likely to be Funded
Not Likely to be Funded Driving Solutions (Street and Intersection Expansion- see Figure 3, Volume 2)				
D73	McLoughlin Boulevard Improvements - Phase 2	Dunes Drive to Clackamas River Bridge	Boulevard and gateway improvements, including pedestrian and bicycle facilities. Access management improvements just north of the I-205 southbound ramps.	Long-term Phase 2 / Not Likely to be Funded
D74	McLoughlin Boulevard Improvements - Phase 3	10 th Street to Main Street	Widen OR 99E to a five-lane cross-section that includes two travel lanes in each direction and a center two-way left-turn lane and/or a median to improve access management. The project will also improve pedestrian and bicycle facilities.	Long-term Phase 2 / Not Likely to be Funded
D75	I-205 Southbound Interchange Improvements	OR 99E/I-205 Southbound Ramps	Add dual left-turn lanes on the southbound OR 99E approach to the southbound I-205 ramp. Widen the on-ramp to the ramp meters to accommodate the dual left-turn approach.	Long-term Phase 3 / Not Likely to be Funded
D76	I-205 Northbound Interchange Improvements	OR 99E/I-205 Northbound Ramps	Add dual left-turn lanes on the westbound I-205 Off-ramp approach to OR 99E. Widen the off-ramp approaching OR 99E to maintain the separated westbound right-turn lane.	Long-term Phase 3 / Not Likely to be Funded
D77	OR 213 Safety Improvement	Molalla Avenue to Conway Drive	Widen to five lanes (two travel lanes in each direction, with a center turn lane/median) with bike lanes and sidewalks	Long-term Phase 4 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

D78	Anchor Way Safety Improvement	18 th Street to Division Street	Realign Anchor Way to connect with Division Street	Long-term Phase 4 / Not Likely to be Funded
D79	OR 213/Redland Road Capacity Improvements	Redland Road to Redland Road undercrossing	Add a third northbound travel lane on OR 213 north of the Redland Road undercrossing. Extend the third southbound travel on OR 213 south of the Redland Road intersection and merge the third lane before the Redland Road undercrossing. Add a right-turn lane (southbound OR 213 to westbound Redland). Convert the Redland Road approach to OR 213 to 1 receiving lane, 2 left-turn approach lanes, and 1 right-turn lane.	Long-term Phase 4 / Not Likely to be Funded
D83	Holly Lane Upgrade	Redland Road to Maple Lane Road	Improve to Residential Minor Arterial cross-section	Long-term Phase 2 / Not Likely to be Funded
D84	Maple Lane Road Upgrade	Beavercreek Road to UGB	Improve to Residential Minor Arterial cross-section	Long-term Phase 2 / Not Likely to be Funded
D85	Loder Road Upgrade	Beavercreek Road to UGB	Improve to Industrial Collector cross-section. Install a roundabout at the Beavercreek Road/Loder Road intersection.	Long-term Phase 2 / Not Likely to be Funded
D86	Livesay Road Upgrade	Redland Road to Swan Avenue	Improve to Residential Collector cross-section.	Long-term Phase 3 / Not Likely to be Funded
D87		Swan Avenue to Holly Lane extension	Improve to Mixed-Use Collector cross-section.	Long-term Phase 3 / Not Likely to be Funded
D88	Donovan Road Upgrade	Holly Lane to UGB	Improve to Mixed-Use Collector cross-section.	Long-term Phase 3 / Not Likely to be Funded
D90	Main Street Upgrade	15 th Street to Agnes Avenue	Improve to Mixed-Use Collector cross-section between 17 th Street and Agnes Avenue. Between 15 th Street and 17 th Street, restripe Main Street to include two 12-foot travel lanes, a six-foot northbound bike lane, a six-foot southbound bike lane, and an eight-foot on-street parking lane on the east side.	Long-term Phase 2 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

D91	Redland Road Upgrade	Holcomb Boulevard to Holly Lane	Improve to Minor Arterial cross-section, as a constrained street	Long-term Phase 2 / Not Likely to be Funded
D93	Beutel Road Upgrade	South End Road to OR 99E-Beutel Road Extension	Improve to Minor Arterial cross-section, as a constrained street	Long-term Phase 2 / Not Likely to be Funded
Not Likely to be Funded Walking Solutions (see Figure 4, Volume 2)				
W1	Dunes Drive Sidewalk Infill	OR 99E to Clackamette Drive	Complete sidewalk gaps the south side of the street	Long-term Phase 4 / Not Likely to be Funded
W2	Main Street Sidewalk Infill	OR 99E to 17 th Street	Complete sidewalk gaps on west/south side of the street. A shared-use path will be added on east/north side per project S1	Included with project D90 / Not Likely to be Funded
W3		17 th Street to 15 th Street	Complete sidewalk gaps the west side of the street	Included with project D90 / Not Likely to be Funded
W4	Agnes Avenue Sidewalk Infill	Main Street to Washington Drive	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W6	Holcomb Boulevard (West of OR 213) Sidewalk Infill	Abernethy Road to OR 213 overcrossing	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W7	Redland Road (West of OR 213) Sidewalk Infill	Abernethy Road to Anchor Way	Complete sidewalk gaps on west/south side of the street. A shared-use path will be added on west side per project S6	Long-term Phase 2 / Not Likely to be Funded
W8	Forsythe Road Sidewalk Infill	Clackamas River Drive to Harley Avenue	Complete sidewalk gaps on south side of the street. A shared-use path will be added on north side per project S7	Long-term Phase 3 / Not Likely to be Funded
W9	Clackamas River Drive Sidewalk Infill	OR 213 to Forsythe Road	Complete sidewalk gaps on east side of the street. A shared-use path will be added on west side per project S8	Long-term Phase 2 / Not Likely to be Funded
W10		Forsythe Road to UGB	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W14	Apperson Boulevard Sidewalk Infill	La Rae Street to Gain Street	Complete sidewalk gaps on the west side of the street	Long-term Phase 3 / Not Likely to be Funded
W15	Swan Avenue Sidewalk Infill	Forsythe Road to Ann Drive	Complete sidewalk gaps on both sides of the street	Long-term Phase 2 / Not Likely to be Funded
W16	Livesay Road Sidewalk Infill	Redland Road to Frank Avenue	Complete sidewalk gaps on both sides of the street	Included with project D86/D87 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

W17	Redland Road (East of OR 213) Sidewalk Infill	Anchor Way to Livesay Road	Complete sidewalk gaps on north side of the street. A shared-use path will be added on south side per project S6	Included with project D91 / Not Likely to be Funded
W18		Livesay Road to UGB	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W19	Donovan Road Sidewalk Infill	Holly Lane to western terminus	Complete sidewalk gaps on north side of the street. A shared-use path will be added on south side per project S12	Long-term Phase 4 / Not Likely to be Funded
W20	Morton Road Sidewalk Infill	Holly Lane to Swan Extension	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W21	Holly Lane Sidewalk Infill	Redland Road to Donovan Road	Complete sidewalk gaps on both sides of the street	Included with project D83 / Not Likely to be Funded
W22		Donovan Road to Maple Lane Road	Complete sidewalk gaps on west side of the street. A shared-use path will be added on east side per project S13	Included with project D83 / Not Likely to be Funded
W23	Maple Lane Road Sidewalk Infill	Beavercreek Road to UGB	Complete sidewalk gaps on both sides of the street	Included with project D84 / Not Likely to be Funded
W24	Thayer Road Sidewalk Infill	Maple Lane Road to UGB	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W25	Loder Road Sidewalk Infill	Beavercreek Road to the Holly Lane Extension	Complete sidewalk gaps on north side of the street. A shared-use path will be added on south side per project S18.	Included with project D85 / Not Likely to be Funded
W26		Holly Lane Extension to the UGB	Complete sidewalk gaps on both sides of the street	Included with project D85 / Not Likely to be Funded
W27	High School Avenue Sidewalk Infill	Meyers Road to Glen Oak Road	Complete sidewalk gaps on the west side of the street	Long-term Phase 3 / Not Likely to be Funded
W28	Glen Oak Road Sidewalk Infill	OR 213 to High School Avenue	Complete sidewalk gaps on both sides of the street	Long-term Phase 2 / Not Likely to be Funded
W29		Coquille Drive to Augusta Drive	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W30	Chanticleer Drive Sidewalk Infill	North terminus to south terminus	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W31	OR 213 Sidewalk Infill	Molalla Avenue to Conway Drive	Complete sidewalk gaps on both sides of the street	Included with project D77 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

W32	Bertha Drive Sidewalk Infill	Clairmont Way to Gaffney Lane	Complete sidewalk gaps on the east side of the street	Long-term Phase 3 / Not Likely to be Funded
W33	Gaffney Lane Sidewalk Infill	Cokeron Drive to Glenview Court	Complete sidewalk gaps on both sides of the street	Long-term Phase 2 / Not Likely to be Funded
W36	Leland Road Sidewalk Infill	Meyers Road to McCord Road	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W37		McCord Road to UGB	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W38	Meyers Road Sidewalk Infill	Leland Road to Frontier Parkway	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W39	Jessie Avenue Sidewalk Infill	Leland Road to Frontier Parkway	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W40	Clairmont Way Sidewalk Infill	Leland Road to Bertha Drive	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W43	McCord Road Sidewalk Infill	Sunset Springs Drive to Leland Road	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W44	Pease Road Sidewalk Infill	Leland Road to Tidewater Street	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W45	Central Point Road Sidewalk Infill	McCord Road to Trade Wind Street	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W46		Parrish Road to Hazeldell Avenue	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W49	Parrish Road Sidewalk Infill	South End Road to eastern terminus	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W50		Kolar Drive to Central Point Road	Complete sidewalk gaps on the south side of the street	Long-term Phase 4 / Not Likely to be Funded
W51	Buetel Road Sidewalk Infill	South End Road to western terminus	Complete sidewalk gaps on both sides of the street	Included with project D93 / Not Likely to be Funded
W52	Partlow Road Sidewalk Infill	South End Road to Central Point Road	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

W53	Rose Road Sidewalk Infill	South End Road to Deer Lane	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W55	Lawton Road Sidewalk Infill	South End Road to Netzel Street	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W57	Canemah Road Sidewalk Infill	Warner Parrott Road to Telford Road	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W58	Hood Street Sidewalk Infill	Linn Avenue to eastern terminus	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W59	Telford Road Sidewalk Infill	Ogden Drive to Holmes Lane	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W60	AV Davis-Ethel Street Sidewalk Infill	Holmes Lane to Leonard Street	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W61	Holmes Lane (west of Bell Court) Sidewalk Infill	Telford Road to Bell Court	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W63	Charman Avenue Sidewalk Infill	Linn Avenue to Electric Avenue	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W66	Warner Street Sidewalk Infill	Prospect Street to Molalla Avenue	Complete sidewalk gaps on the south side of the street	Long-term Phase 4 / Not Likely to be Funded
W67	Holmes Lane (east of Bell Court) Sidewalk Infill	Bell Court to Prospect Street	Complete sidewalk gaps on the north side of the street	Long-term Phase 3 / Not Likely to be Funded
W68	Pearl Street Sidewalk Infill	Linn Avenue to Eluria Street	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W69	Center Street Sidewalk Infill	Clinton Street to 1 st Street	Complete sidewalk gaps on both sides of the street	Long-term Phase 3 / Not Likely to be Funded
W71	15 th Street Sidewalk Infill	Harrison Street to Jefferson Street	Complete sidewalk gaps on both sides of the street	Long-term Phase 4 / Not Likely to be Funded
W72	Anchor Way Sidewalk Infill	18 th Street to Redland Road	Complete sidewalk gaps on east side of the street. A shared-use path will be added on west side per project S49.	Long-term Phase 4 / Not Likely to be Funded
Not Likely to be Funded Biking Solutions (see Figure 5, Volume 2)				
B4	Main Street Bike Lanes	Agnes Avenue to I-205	Add a bike lane to the west side of the street. A shared-use	Long-term Phase 3 / Not Likely

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

		undercrossing	path will be added on east/north side per project S1	to be Funded
B7	Agnes Avenue Bike Lanes	Main Street to Washington Drive	Add bike lanes to both sides of the street	Long-term Phase 4 / Not Likely to be Funded
B8	Abernethy Road Bike Lanes	Washington Street to Redland Road	Add a bike lane to the south side of the street. A shared-use path will be added on the north side per project S2.	Long-term Phase 2 / Not Likely to be Funded
B9	Holcomb Boulevard (West of OR 213) Bike Lanes	Abernethy Road to OR 213 overcrossing	Add bike lanes to both sides of the street	Long-term Phase 2 / Not Likely to be Funded
B10	Forsythe Road Bike Lanes	Clackamas River Drive to Harley Avenue	Add a bike lane to the south side of the street. A shared-use path will be added on north side per project S7	Long-term Phase 4 / Not Likely to be Funded
B11	Clackamas River Drive Bike Lanes	Forsythe Road to UGB	Add bike lanes to both sides of the street	Long-term Phase 3 / Not Likely to be Funded
B13	Apperson Boulevard Shared Roadway	Forsythe Road to Holcomb Boulevard	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
B14	Swan Avenue Bike Lanes	Forsythe Road to Holcomb Boulevard	Add bike lanes to both sides of the street	Long-term Phase 2 / Not Likely to be Funded
B15	Swan Avenue Shared Roadway	Holcomb Boulevard to southern terminus	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
B16	Livesay Road Bike Lanes	Redland Road to Frank Avenue	Add bike lanes to both sides of the street	Long-term Phase 4 / Not Likely to be Funded
B17	Donovan Road Bike Lanes	Holly Lane to western terminus	Add a bike lane to the north side of the street. A shared-use path will be added on south side per project S12	Long-term Phase 4 / Not Likely to be Funded
B18	Morton Road Bike Lanes	Holly Lane to Swan Extension	Add bike lanes to both sides of the street	Long-term Phase 4 / Not Likely to be Funded
B19	Holly Lane Bike Lanes	Redland Road to Donovan Road	Add bike lanes to both sides of the street	Included with project D83 / Not Likely to be Funded
B20		Donovan Road to Maple Lane Road	Add a bike lane to the west side of the street. A shared-use path will be added on east side per project S13	Included with project D83 / Not Likely to be Funded
B21	Maple Lane Bike Lanes	Walnut Grove Way to UGB	Add bike lanes to both sides of the street	Included with project D84 / Not Likely to be Funded
B22	Thayer Road Bike Lanes	Elder Road to UGB	Add bike lanes to both sides of the street	Long-term Phase 3 / Not Likely

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

				to be Funded
B23	Loder Road Bike Lanes	Beavercreek Road and the Holly Lane Extension	Add a bike lane to the north side of the street. A shared-use path will be added on south side per project S18.	Included with project D85 / Not Likely to be Funded
B24		Holly Lane Extension to the UGB	Add bike lanes to both sides of the street	Included with project D85 / Not Likely to be Funded
B25	High School Avenue Shared Roadway	Meyers Road to Glen Oak Road	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
B26	Glen Oak Road Bike Lanes	Coquille Drive to Augusta Drive	Add bike lanes to both sides of the street	Long-term Phase 3 / Not Likely to be Funded
B27	Coquille Drive Shared Roadway	Glen Oak Road to Turtle Bay Drive	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
B28	Chanticleer Drive Shared Roadway	North terminus to south terminus	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
B30	Bertha Drive Bike Lanes	Clairmont Way to Gaffney Lane	Add bike lanes to both sides of the street	Long-term Phase 4 / Not Likely to be Funded
B31	Gaffney Lane Bike Lanes	Cokeron Drive to Glenview Court	Add bike lanes to both sides of the street	Long-term Phase 3 / Not Likely to be Funded
B34	Leland Road Bike Lanes	Kalal Court to UGB	Add bike lanes to both sides of the street	Long-term Phase 3 / Not Likely to be Funded
B36	Jessie Avenue Bike Lanes	Leland Road to Jessie Court	Add bike lanes to both sides of the street	Long-term Phase 4 / Not Likely to be Funded
B38	McCord Road Bike Lanes	Central Point Road to Leland Road	Add bike lanes to both sides of the street	Long-term Phase 2 / Not Likely to be Funded
B39	Pease Road Shared Roadway	Leland Road to Tidewater Street	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
B40	Central Point Road Bike Lanes	Partlow Road to Swallowtail Place	Complete bike lane gaps on both sides of the street	Long-term Phase 2 / Not Likely to be Funded
B41		Parrish Road to Skellenger Way	Add bike lanes to both sides of the street	Long-term Phase 2 / Not Likely to be Funded
B43	Parrish Road Shared	South End Road to eastern	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

	Roadway	terminus		to be Funded
B44	Parrish Road Bike Lanes	Kolar Drive to Central Point Road	Add bike lanes to both sides of the street	Long-term Phase 4 / Not Likely to be Funded
B45	Buetel Road Bike Lanes	South End Road to western terminus	Add bike lanes to both sides of the street	Included with project D93 / Not Likely to be Funded
B46	Partlow Road Bike Lanes	South End Road to Central Point Road	Complete bike lane gaps on both sides of the street	Long-term Phase 2 / Not Likely to be Funded
B47	Rose Road Bike Lanes	South End Road to Deer Lane	Add bike lanes to both sides of the street	Long-term Phase 4 / Not Likely to be Funded
B48	Lawton Road Shared Roadway	South End Road to Netzel Street	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
B49	Canemah Road Shared Roadway	Warner Parrott Road to Telford Road	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
B50	Telford Road Shared Roadway	Charman Avenue to Holmes Lane	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
B51	AV Davis-Ethel Street Shared Roadway	Holmes Lane to Leonard Street	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
B52	Holmes Lane Shared Roadway	Telford Road to Linn Avenue	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
B54	Brighton Avenue-Creed Street Shared Roadway	Charman Avenue to Waterboard Park Road	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
B56	Pearl Street Shared Roadway	Molalla Avenue to Eluria Street	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
B57	Center Street Shared Roadway	Clinton Street to 5 th Street	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
B58	South 2 nd Street Shared Roadway	High Street to Tumwater Drive	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
B59	5 th Street Shared Roadway	Washington Street to Center Street	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
B61	Taylor Street Shared	7 th Street to 12 th Street	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

	Roadway			to be Funded
B62	12 th Street Shared Roadway	Taylor Street to Washington Street	Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
B63	15 th Street Shared Roadway	Division Street to John Adams Street	Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
B64	Anchor Way Bike Lanes	18 th Street to Redland Road	Add a bike lane to the east side of the street. A shared-use path will be added on west side per project S49.	Long-term Phase 2 / Not Likely to be Funded
Not Likely to be Funded Shared-Use Path Solutions (see Figure 6, Volume 2)				
S1	Main Street Shared-Use Path	Clackamette Park to 17 th Street	Add a shared-use path on the north/east side of the street	Long-term Phase 2 / Not Likely to be Funded
S2	Abernethy Road Shared-Use Path	Main Street to Redland Road	Add a shared-use path on the north side of the street from Main Street to Redland Road. Add a railroad gate at the 17 th Street rail crossing. Will require permission for an at-grade pedestrian and bicycle rail crossing.	Long-term Phase 3 / Not Likely to be Funded
S3	OR 99E Shared-Use Path	10 th Street to Railroad Avenue	Add a shared-use path on the west side of the street	Included with project D74 / Not Likely to be Funded
S4	Abernethy Creek Park Shared-Use Path	John Adams Street to 15 th Street	Add a shared-use path between John Adams and 15 th , with a bridge over the gully	Long-term Phase 4 / Not Likely to be Funded
S5	Abernethy Road-Clackamas River Drive Shared-Use Path	Abernethy Road to Clackamas River Drive	Add a shared-use path on the east side of the Abernethy-Washington extension and on the east side of the Washington Street realignment to Clackamas River Drive	Long-term Phase 2 / Not Likely to be Funded
S6	Redland Road Shared-Use Path	Abernethy Road to Livesay Road	Add a shared-use path on the west/south side of the street	Long-term Phase 2 / Not Likely to be Funded
S7	Forsythe Road Shared-Use Path	Clackamas River Drive to UGB	Add a shared-use path on the north side of the street	Long-term Phase 4 / Not Likely to be Funded
S8	Clackamas River Drive Shared-Use Path	OR 213 to Forsythe Road	Add a shared-use path on the west side of the street	Long-term Phase 2 / Not Likely to be Funded
S9	Swan-Livesay Shared-Use Path	Bonn Street to Livesay Road	Add a shared-use path between Swan and Livesay, with a bridge over the gully	Long-term Phase 4 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

S10	Redland-Holcomb Shared-Use Path	Redland Road to Holcomb Boulevard	Add a shared-use path along the north side of the gully from the Redland/Livesay to Holcomb/Oak Tree intersection	Long-term Phase 3 / Not Likely to be Funded
S11	Holcomb- Forsythe Road Shared-Use Path	Holcomb Boulevard to Forsythe Road	Add a shared-use path connecting the Redland-Holcomb Shared-Use Path to the Forsythe Road Shared-Use Path	Long-term Phase 4 / Not Likely to be Funded
S12	Redland-Holly Shared-Use Path	Redland Road to Holly Lane	Add a shared-use path along the east side of the gully between the Redland/Livesay and Holly/Donovan intersection. Will require a bridge over the gully south of Redland Road	Long-term Phase 2 / Not Likely to be Funded
S13	Holly Lane Shared-Use Path	Donovan Road to Maple Lane Road	Add a shared-use path on the east side of the street	Long-term Phase 2 / Not Likely to be Funded
S16	Loder-Timbersky Shared-Use Path	Loder Road to Timbersky Way	Add a shared-use path on the east side of the Holly Lane extension between Loder and Timbersky.	Long-term Phase 3 / Not Likely to be Funded
S17	Clairmont Drive Shared-Use Path	Beavercreek Road to UGB	Add a shared-use path on the north side of the Clairmont Drive extension between Beavercreek Road and the UGB.	Long-term Phase 3 / Not Likely to be Funded
S19	Meyers Road Extension Shared-Use Path	Holly Lane Extension to UGB	Add a shared-use path on the north side of the Meyers Road extension between the Holly Lane extension and the UGB.	Long-term Phase 3 / Not Likely to be Funded
S20	Timbersky Extension Shared-Use Path	Pebble Beach Drive to Meadow Lane Extension	Add a shared-use path on the east side of Beavercreek Road and the north side of the Timbersky Way extension between Pebble Beach Drive and the Meadow Lane Extension Shared-use Path	Long-term Phase 3 / Not Likely to be Funded
S21	Meadow Lane Extension Shared-use Path	Old Acres Lane to UGB (north of Loder Road)	Add a shared-use path on the east side of the Meadow Lane extension from Meadow Lane to the Glen Oak Road extension. Between the Glen Oak Road extension and the UGB (north of Loder Road) the shared-use path will run along the west side of the ridge	Long-term Phase 4 / Not Likely to be Funded
S22	Meyers-Beavercreek Shared-Use Path	Morrie Drive to Beavercreek Road	Add a shared-use path under the power lines between Morrie Drive and Beavercreek Road. Will require a portion of the parking lot between Molalla and Beavercreek	Long-term Phase 2 / Not Likely to be Funded
S23	Meyers Road Shared-Use Path	Meyers-Beavercreek Shared-Use Path to OR 213	Add a shared-use path on the south side of Meyers Road between the Meyers-Beavercreek Shared-Use Path and the Clackamas Community College Shared-use Path	Long-term Phase 3 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

S25	Falcon-Pompei Shared-Use Path	Falcon Drive to Naples Street	Add a shared-use path between Falcon Drive and Naples Street	Long-term Phase 3 / Not Likely to be Funded
S26	Leland Road-Wesley Lynn Park Shared-Use Path	Leland Road to Wesley Lynn Park	Add a shared-use path between Leland Road and the Wesley Lynn Park Shared-Use Path	Long-term Phase 3 / Not Likely to be Funded
S27	Hillendale Park-Leonard Street Shared-Use Path	Hillendale Park Shared-Use Path to Leonard Street	Add a shared-use path along the western boundary of the Clackamas County Red Soils Campus	Long-term Phase 2 / Not Likely to be Funded
S28	Beavercreek-Hilltop Shared-Use Path	Beavercreek Road to Fox Lane	Add a shared-use path along the ridge connecting the Meyers-Beavercreek Shared-Use Path to Hilltop Avenue	Long-term Phase 3 / Not Likely to be Funded
S29	Fremont-Hiefield Shared-Use Path	Fremont Street to Hiefield Court	Add a shared-use path between Fremont Street and the Hillendale Park-Leonard Street Shared-Use Path	Long-term Phase 4 / Not Likely to be Funded
S30	Orchard Grove-Hazelnut Shared-Use Path	Orchard Grove Drive to Hazelnut Court	Add a shared-use path between Orchard Grove Drive and Hazelnut Court	Long-term Phase 3 / Not Likely to be Funded
S31	South End-Deer Lane Shared-Use Path	Deer Lane to Filbert Drive	Add a shared-use path between the Deer Lane extension and Filbert Drive	Long-term Phase 3 / Not Likely to be Funded
S32	Deer Lane Extension Shared-Use Path	Buetel Road to Deer Lane	Add a shared-use path on the west side of the Deer Lane extension	Long-term Phase 3 / Not Likely to be Funded
S33	Buetel-Kolar Shared-Use Path	Buetel Road to Kolar Drive	Add a shared-use path on the west/south side of the Deer Lane extension between Buetel Road and Kolar Drive	Long-term Phase 4 / Not Likely to be Funded
S34	OR 99E-Buetel Shared-Use Path	OR 99E to Buetel Road	Add a shared-use path between OR 99E and Buetel Road	Long-term Phase 3 / Not Likely to be Funded
S35	Canemah-Buetel Road Extension Shared-Use Path	5 th Avenue to OR 99E-Buetel Road Extension	Add a shared-use path connecting Canemah to the OR 99E-Buetel Road Extension Multi-Use Path	Long-term Phase 3 / Not Likely to be Funded
S37	OR 99E (south of Railroad Avenue) Shared-Use Path	Railroad Avenue to UGB	Add a shared-use path along the north side of the street. Rehabilitate existing boardwalk between South 2 nd Street and Hedges Street	Long-term Phase 2 / Not Likely to be Funded
S38	Singer Creek Park Shared-Use Path	Singer Creek Park to Electric Avenue	Add a shared-use path from Singer Creek Park to Electric Avenue	Long-term Phase 3 / Not Likely to be Funded
S39	Electric-East Shared-Use Path	Electric Avenue to East Street	Add a shared-use path from Electric Avenue to East Street	Long-term Phase 3 / Not Likely to be Funded
S40	Hood-Warner Shared-Use	Hood Street to Warner Street	Add a shared-use path from Hood Street to Warner Street	Long-term Phase 2 / Not Likely

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

	Path			to be Funded
S41	Beavercreek-Laurel Shared-Use Path	Beavercreek Road to Laurel Lane	Add a shared-use path on the western edge of the cemetery, from Beavercreek Road to Laurel Lane	Long-term Phase 2 / Not Likely to be Funded
S42	Fox-Hillcrest Shared-Use Path	Fox Lane to Hillcrest Street	Add a shared-use path from Fox Lane to the Mountainview Cemetery	Long-term Phase 3 / Not Likely to be Funded
S43	Magnolia-Eluria Shared-Use Path	Magnolia Street to Eluria Street	Add a shared-use path between Magnolia Street and Eluria Street	Long-term Phase 3 / Not Likely to be Funded
S44	End of the Oregon Trail Shared-Use Path	Abernethy Road to east of the Abernethy-Washington Street extension	Add a shared-use path	Long-term Phase 3 / Not Likely to be Funded
S45	4 th Street Shared-Use Path	West of Jackson Street to east of Monroe Street	Add a shared-use path	Long-term Phase 3 / Not Likely to be Funded
S46	John Adams Shared-Use Path	10 th Street to west of 11 th Street	Add a shared-use path	Long-term Phase 3 / Not Likely to be Funded
S47	Barclay Park Shared-Use Path	Jefferson Street to John Adams Street	Add a shared-use path through Barclay Park	Long-term Phase 3 / Not Likely to be Funded
S48	Atkinson Park Shared-Use Path	17 th Street to 18 th Street	Add a shared-use path	Long-term Phase 4 / Not Likely to be Funded
S49	Anchor Way Shared-Use Path	18 th Street to Redland Road	Add a shared-use path on the west side of the street	Long-term Phase 4 / Not Likely to be Funded
S50	King Elementary School Shared-Use Path	South End Road to Woodfield Court	Add a shared-use path along the northern boundary of King Elementary School between Amanda Court and Woodfield Court	Long-term Phase 3 / Not Likely to be Funded
S51	Chanticleer-Coquille Shared-Use Path	Chanticleer Drive to Coquille Drive	Add a shared-use path between Chanticleer Drive and Coquille Drive	Long-term Phase 3 / Not Likely to be Funded
S52	Linn Avenue Shared-Use Path	Electric Avenue to Pearl Street	Add a shared-use path between Electric Avenue and Pearl Street	Long-term Phase 2 / Not Likely to be Funded
Not Likely to be Funded Transit Solutions				
T4	Oregon City TMA Startup Program	Oregon City Regional Center	Implements a transportation management association program with employers.	Long-term Phase 2 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

Not Likely to be Funded Street Crossing Solutions (see Figure 6, Volume 2)				
C1	Clackamette Drive Crossing	Clackamette Park overflow lot to the Clackamette Park entrance	Install crosswalk and pedestrian activated flasher on Clackamette Drive	Long-term Phase 3 / Not Likely to be Funded
C2	Main Street Crossing	I-205 Shared Use Path to south of Main Street	Relocate the existing crosswalk on Main Street approximately 175 feet southeast to align with the I-205 Shared Use Path. Install a pedestrian activated flasher.	Long-term Phase 4 / Not Likely to be Funded
C3	Holcomb/Front Family Friendly Route Crossing	Holcomb Boulevard/Front Avenue intersection	Install crosswalk and pedestrian activated flasher on Holcomb Boulevard	Long-term Phase 4 / Not Likely to be Funded
C4	Holcomb/Swan Crossing	Holcomb Boulevard/Swan Avenue intersection	Install crosswalk and pedestrian activated flasher on Holcomb Boulevard	Long-term Phase 4 / Not Likely to be Funded
C5	Holcomb Boulevard Shared-Use Path Crossing	Holcomb Boulevard/Oak Tree Terrace intersection	Install crosswalk and pedestrian activated flasher on Holcomb Boulevard	Long-term Phase 4 / Not Likely to be Funded
C6	Holcomb/Winston Crossing	Holcomb Boulevard/Winston Drive intersection	Install crosswalk and pedestrian activated flasher on Holcomb Boulevard	Long-term Phase 4 / Not Likely to be Funded
C7	Redland Road Shared-Use Path Crossing	Redland Road/Livesay Road intersection	Install crosswalk and pedestrian activated flasher on Redland Road	Long-term Phase 2 / Not Likely to be Funded
C8	Holly Lane Shared-Use Path Crossing	Holly Lane/Donovan Road intersection	Install crosswalk and pedestrian activated flasher on Holly Lane	Long-term Phase 4 / Not Likely to be Funded
C9	Maple Lane Road Shared-Use Path Crossing	Maple Lane Road/Holly Lane intersection	Install crosswalk and pedestrian activated flasher on Maple Lane Road	Long-term Phase 2 / Not Likely to be Funded
C10	Thayer Road Shared-Use Path Crossing	Thayer Road/Holly-Thayer Shared-Use Path intersection	Install crosswalk and curb extensions on Thayer Road	Long-term Phase 4 / Not Likely to be Funded
C12	Beavercreek Road/Pebble Beach Drive Shared-Use Path Crossing	Beavercreek Road/ Pebble Beach Drive intersection	Install crosswalk and pedestrian activated flasher on Beavercreek Road	Long-term Phase 4 / Not Likely to be Funded
C13	Meyers Road Extension/Loder Road Extension Shared-Use Path Crossing	Meyers Road Extension/Loder Road Extension intersection	Install crosswalk and pedestrian activated flasher on Meyers Road	Long-term Phase 3 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

C14	Glen Oak Road Shared-Use Path Crossing	Glen Oak Road/Loder Road Extension intersection	Install crosswalk and curb extensions on Glen Oak Road	Long-term Phase 4 / Not Likely to be Funded
C15	Meyers Road Shared-Use Path Crossing	Meyers Road/Moccasin Way intersection	Install crosswalk and pedestrian activated flasher on Meyers Road	Long-term Phase 3 / Not Likely to be Funded
C16	Clairmont Way Family Friendly Route Crossing	Clairmont Way/Eastborne Drive intersection	Install pedestrian activated flasher at the existing crosswalk on Clairmont Way near Eastborne Drive	Long-term Phase 3 / Not Likely to be Funded
C17	Leland Road Family Friendly Route Crossing	Leland Road/Reddaway Avenue intersection	Install pedestrian activated flasher at the existing crosswalk on Leland Road at Reddaway Avenue	Long-term Phase 2 / Not Likely to be Funded
C18	Meyers Road Family Friendly Route Crossing	Leland Road/Hiefield Court intersection	Install crosswalk and pedestrian activated flasher on Leland Road	Long-term Phase 4 / Not Likely to be Funded
C19	Warner Milne Road Shared-Use Path Crossing	Warner Milne Road/Hillendale Park-Leonard Street Shared-Use Path intersection	Install crosswalk and pedestrian activated flasher on Warner Milne Road	Long-term Phase 2 / Not Likely to be Funded
C20	Hampton Drive Family Friendly Route Crossing	Central Point Road/Hampton Drive intersection	Install crosswalk and pedestrian activated flasher on Central Point Road	Long-term Phase 3 / Not Likely to be Funded
C21	Hazelnut Court Family Friendly Route Crossing	Central Point Road/ Hazelnut Court intersection	Install crosswalk and curb extensions on Central Point Road	Long-term Phase 3 / Not Likely to be Funded
C22	Deer Lane Extension Shared-Use Path Crossing	South End Road/Deer Lane Extension intersection	Install crosswalk and pedestrian activated flasher on South End Road	Long-term Phase 4 / Not Likely to be Funded
C23	Buetel Road/Deer Lane Extension Shared-Use Path Crossing	Buetel Road/Deer Lane Extension intersection	Install crosswalk and curb extensions on Buetel Road	Long-term Phase 3 / Not Likely to be Funded
C24	Filbert Drive Family Friendly Route Crossing	South End Road/Filbert Drive intersection	Install crosswalk and pedestrian activated flasher on South End Road	Long-term Phase 3 / Not Likely to be Funded
C25	Warner Parrot/Boynton Family Friendly Route Crossing	Warner Parrot Road/Boynton Street intersection	Install crosswalk and pedestrian activated flasher on Warner Parrot Road	Long-term Phase 2 / Not Likely to be Funded
C26	South End/Amanda Family Friendly Route Crossing	South End Road/Amanda Court intersection	Install pedestrian activated flasher at the existing crosswalk on South End Road at Amanda Court	Long-term Phase 2 / Not Likely to be Funded

Projects Identified in the Transportation System Plan Update

Table A below displays the projects expected to be funded by 2035 while Table B displays the projects which are not expected to be funded by 2035. The project numbers are denoted as a driving (“D”), walking (“W”), biking (“B”), shared-use path (“S”), transit (“T”), street crossing (“C”) or a family-friendly route (“FF”).

- Short-term: projects recommended for implementation in the 1 to 5 year timeframe.
- Medium-term: projects recommended for implementation in the 5 to 10 year timeframe.
- Long-term: projects likely to be implemented beyond 10 years from the time of this plan; these are projects that are important for the development of the City transportation network, but are unlikely to be funded in the next 10 years.

C27	OR 99E/Buettel Extension Shared-Use Path Crossing	OR 99E/Buettel Road Extension intersection	Install crosswalk and pedestrian activated flasher on OR 99E	Long-term Phase 4 / Not Likely to be Funded
C28	AV Davis Road Crossing	Linn Avenue/AV Davis Road intersection	Install a pedestrian activated flasher at the existing crosswalk on Linn Avenue at AV Davis Road	Long-term Phase 2 / Not Likely to be Funded
C29	Holmes/Leonard Family Friendly Route Crossing	Holmes Lane/Leonard Street intersection	Install crosswalk and pedestrian activated flasher on Holmes Lane	Long-term Phase 2 / Not Likely to be Funded
C30	Barclay Hills Drive Crossing	Molalla Avenue/Barclay Hills Drive intersection	Install a pedestrian activated flasher at the existing crosswalk on Molalla Avenue at Barclay Hills Drive	Long-term Phase 4 / Not Likely to be Funded
C31	Park Drive Crossing	Linn Avenue/Park Drive intersection	Install a pedestrian activated flasher at the existing crosswalk on Linn Avenue at Park Drive	Long-term Phase 2 / Not Likely to be Funded
C32	Electric Avenue Family Friendly Route Crossing	Linn Avenue/Electric Avenue	Install crosswalk and pedestrian activated flasher on Linn Avenue	Long-term Phase 2 / Not Likely to be Funded
C33	JQ Adams/5 th Family Friendly Route Crossing	5 th Street/JQ Adams Street intersection	Install crosswalk and pedestrian activated flasher on 5 th Street	Long-term Phase 4 / Not Likely to be Funded
C34	Jackson/7 th Family Friendly Route Crossing	7 th Street/Jackson Street intersection	Install crosswalk and pedestrian activated flasher on 7 th Street	Long-term Phase 2 / Not Likely to be Funded
C36	Jerome Street Crossing	OR 99E/Jerome Street	Install crosswalk and pedestrian activated flasher on OR 99E in Canemah	Long-term Phase 2 / Not Likely to be Funded
Not Likely to be Funded Family-Friendly Routes (see Figure 4 or 5, Volume 2)				
FF1	John Adams Family Friendly Route	Abernethy Road to Abernethy Creek Park	Add sidewalks on both sides of the street. Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
FF2	Front Avenue Family Friendly Route	Forsythe Road to Holcomb Boulevard	Add sidewalks on the east side of the street. Add wayfinding, traffic calming and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
FF3	Cleveland Street Family Friendly Route	Apperson Boulevard to Swan Avenue	Add sidewalks on both sides of the street. Add wayfinding and shared lane markings	Long-term Phase 3 / Not Likely to be Funded
FF4	Jacobs-Beemer Family Friendly Route	Holcomb Boulevard to Redland-Holcomb Shared-Use Path	Add sidewalks on both sides of the street. Add wayfinding and shared lane markings	Long-term Phase 4 / Not Likely to be Funded
