

# **Emergency Operations Plan**

January 2017 through December 2021

Chief Jim Band

# Purpose of the Emergency Operations Plan:

- Provides framework for coordinated response and recovery activities during an emergency. (Identification of roles)
- Primarily applicable to extraordinary situations and is not intended for use in response to typical, day-to-day, emergency situations.
- Complements the Clackamas County EOP, the State of Oregon Emergency Management Plan, and the National Response Framework.
- It also identifies critical tasks needed to support a wide range of response activities.

# Four Phases of Emergency Management:

- **Mitigation and Prevention:** To eliminate or reduce likelihood and/or consequences of hazards.
- **Preparedness:** To develop and enhance the response capabilities that will be needed in an emergency.
- **Response:** Emergency services during a crisis — these activities seek to reduce casualties and damage and to speed recovery. (*Priority:* 1. lifesaving, 2. incident stabilization, 3. property conservation)
- **Recovery:** Both a long and short term process. Short term restores vital service to the community and to provide basic public needs. Long term focuses on getting the community back to normal.

## Declaration Process:

- A declaration of emergency by the City is the first step in accessing State and Federal disaster assistance.
- The City Commission has the legal authority under Ordinance No. 03-1015 to declare a local emergency.
- If no quorum can be assembled due to absence or incapacity: City Manager, Police Chief, Incident Commander.
- Must Include: description of the situation and existing conditions, delineate the geographic boundaries affected, and outline what special powers are being activated. If requesting State/Federal help, must declare that all resources are expended and what assistance is required.

# Changes:

- **Added Incident Annex #12: Dam Failure (Clackamas River)**
  - River Mill Dam (Estacada).
  - North Fork Dam and Faraday Diversion Dam, both southeast of Estacada.
  - Timothy Lake Dam (includes Harriet and Frog Lake Dams)
- **Volunteer and Donation Management:** OCPD Community Outreach.
- Removed Hazard Analysis Matrix
- Other incidental changes (names, roles, plan dispersion, etc.)
- Thumb drives vs hard copies.
