

# City of Oregon City

625 Center Street  
Oregon City, OR 97045  
503-657-0891

## Staff Report

File Number: 18-281

**Agenda Date:** 6/12/2018

**Status:** Agenda Ready

**To:** City Commission

**Agenda #:** 3b.

**From:** Public Works Director John Lewis

**File Type:** Presentation

### **SUBJECT:**

Metro Regional Transportation Plan Update

### **RECOMMENDED ACTION (Motion):**

Provide feedback and guidance as needed.

### **BACKGROUND:**

Metro has been working with Oregon City and other local, regional and state partners and the public to update a regional shared vision and strategy for investing in the transportation system for the next 25 years.

The Regional Transportation Plan (RTP) is a blueprint to guide investments for all forms of travel - motor vehicle, transit, bicycle and walking - and the movement of goods and freight throughout the Portland metropolitan region. The plan identifies current and future transportation needs, investments needed to meet those needs and what funds the region expects to have available over the next 25 years to make those investments a reality.

Federal law requires Metro to lead and coordinate regular updates to the Regional Transportation Plan to respond to the needs of a changing region. The plan must be updated by 2018 to meet state and federal requirements. The last major update to the plan was completed in 2010. A minor update occurred in 2014.

The purpose of the 2018 amendment is to make necessary funding corrections, increases, fund reprogramming, and add new projects.

Oregon City along with 24 other Metro Cities and other regional partners have been working to establish local priorities for federal, state and regional funding opportunities from 2018 - 2040

Focusing on the main outcomes of the vision, there are four key takeaways from the analysis of the draft constrained list of projects.

1. Safety is a priority in high injury corridors and communities of color.
2. Congestion will not ease, but investments will improve reliability.
3. Increased physical activity and reduced emissions will help people live healthier lives, but the region will fall short of its adopted greenhouse gas reduction commitment.
4. Affordability will improve with better access to travel options, but not everyone will see the

same level of benefit.

This presentation will provide information pertaining to the RTP update including the latest thinking regarding RTP projects affecting Oregon City and the level of revenue expected within the RTP planning horizon.
