Re: Wallis Engineering Contract (CI-19-001); 2019 Oregon City Roadway Reconstruction Projects

The original request for approval of a PSA contract for Wallis Engineering for the 2019 Oregon City Roadway Reconstruction Projects was in the amount of \$78,444.68.

The new request is \$90,339.76.

The increase is due to a change in scope whereby Public Works decided to add the resurfacing of the Hazelwood Sanitary Sewer Project area to the scope of this contract rather than creating a separate second paving project. The roads added to the scope are Hazelwood Drive from Barker to Hartke Loop and Vine Street from Hazelwood to Telford.

Public Works feels that joining the two paving projects as one will increase the scope, create more bidders, potentially create more competitive bids, and reduce staff administrative time in managing the project.
