Subject: GLUA-20-00012 CU-20-00001 SP-20-00022: Oregon City Christian Church

Attn: Pete Walter, AICP, Senior Planner

I am contacting you regarding the application to construct a recreation building on the Oregon City Christian Church property.

After looking over the drawing and reading the application I am concerned about the current driveway exiting the back of the property on to Paulsen Drive. I want to insure that this will not open up for regular recreation use or become a major conduit for the rec center or for the greatly enlarged parking lot and activities that might be held there.

We have a quiet neighborhood and I live right on the corner where this exits. I also want to clarify that the large new parking lot will only be for parking and not activities. When they have held a few events there (concert, games) it is very loud and drove me inside and not able to enjoy the peace of my backyard. We are a quiet neighborhood with an older population.

While I understand their mission to provide member activities, it is not what our neighborhood signed up for when we purchased our homes.

Thank you for information you can provide.
