Linn Avenue/Leland Roads/Meyers Road Corridor Plan Presentation

BACKGROUND:

The Linn Avenue/Leland Road/Meyers Road Corridor Plan (Plan) is being developed to address deficiencies in the pedestrian and bicycle facilities along this corridor. The corridor spans 5th Street at Jackson Street to Meyers Road at Moccasin Way. The current route contains very few existing sidewalks and designated bicycle lanes. The Plan will identify these inadequacies and look at connecting important features along the corridor (i.e. parks and schools). Wallis Engineering and DKS Associates have provided the City with an Intersection Control Analysis Draft Report that the City would like to present to the public for feedback/comment.
