Clackamas Cove Water Quality and Habitat Improvement Feasibility Study

RECOMMENDED ACTION (Motion):

This is to update the City Commission on the Clackamas Cove Water Quality and Habitat Improvement Feasibility Study prepared by Cascade Environmental Group.

BACKGROUND:

John Runyon, a watershed ecologist with Cascade Environmental Group, will be presenting a PowerPoint presentation on the Clackamette Cove Water Quality Habitat Improvement Feasibility Study (Draft). Cascade Environmental Group is under contract with the City to conduct an Environmental Feasibility Study for Clackamette Cove, and the draft report is complete and available for discussion.

The feasibility study identifies potential and feasible projects that would improve water quality and establish habitat restoration in and around Clackamette Cove.
